ETERNAL NIGHTS

Capt. Kendall Thomas has been plagued by dreams of blood, dreams so horrifying they leave her trembling in the night. Kendall has good reason to be afraid. She's discovered thieves are stealing artifacts from the alien city on Jarved Nine, and the smugglers will do anything to protect their lucrative sideline—even commit murder.

The last man Kendall wanted to endanger was her best friend Wyatt Montgomery, but the stubborn Special Ops captain followed her when she went to gather evidence, and the smugglers trapped them both in the city's ancient pyramid. Now by day, they're chased through labyrinthine tunnels, deeper and deeper into the heart of the temple. But in the cloak of darkness, they can no longer deny the powerful force drawing them together, the passionate dreams that leave them aching with need, the touch of skin on skin that makes them long for—ETERNAL NIGHTS.
